Hello Mr. Branton

It was great talking with you. I hope you will be able to present at our upcoming geomatics conference entitled Spring into Geomatics.

The GeoNOVA Office is pleased to present Spring into Geomatics 2013. This event will provide a great opportunity for geomatics practitioners and those simply interested in geography to come together and celebrate geomatics in Nova Scotia. Work is underway to finalize the Agenda for the event and we will post that in the very near future. As mentioned above, our theme for the day is "Open Data" and plans are underway to have representatives from Federal, Provincial and Municipal levels of government, as well as the Private sector who can speak to the theme of "Open data" and share their experiences.

As in years past, we are expecting approximately 150 geomatics professionals to attend.

We expect your presentation would be around 20 minutes in length with a few moments for general questions for the audience or moderator of that particular section of the program.

Hope you will be able to attend.

Regards,

Anthony Matthews
